EXPERIENCE

Writecream

Mar 2026 – Present

Full Stack Developer Intern

- Engineered and shipped production-ready Chrome extensions and WordPress plugins for an AI tools ecosystem serving 1.5M+ users, using React, Next.js, TypeScript, and Manifest V3.
- Built pixel-accurate, accessible React interfaces from design specifications, implementing loading, error, and empty states, responsive layouts, and ARIA-based accessibility.
- Integrated LLM and third-party REST and GraphQL APIs with secure authentication, request throttling, and robust error handling, while improving Lighthouse scores and reducing bundle size.
- Created reusable React components used across different AI tools to keep the UI clean and consistent.
- Added new features and fixed bugs to improve the speed and overall experience of the AI tools.

Bulkdoor

Dec 2025 – Feb 2026

Frontend Developer Intern

- Developed and shipped responsive, reusable React components for an early-stage startup, translating product requirements into clean, maintainable, production-ready UI.
- Worked closely with founders in a fast-paced environment to rapidly prototype features, iterate on feedback, and deliver releases on tight timelines.
- Integrated REST APIs into the frontend with proper state handling, error management, and consistent rendering across mobile, tablet, and desktop breakpoints.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, HTML/CSS, SQL

Frameworks & Libraries: React, Next.js, Node.js, Express.js, TailwindCSS, REST APIs

Databases: MySQL, MongoDB, PostgreSQL, Supabase, RDBMS, Query Optimization

Developer Tools: Git, GitHub, VS Code, Postman, Docker, Vercel, Netlify, Cloudinary

Core CS: Data Structures & Algorithms, OOP, DBMS, Software Engineering, Problem Solving

PROJECTS

Thumb-io | *React, Next.js, TypeScript, TailwindCSS, Node.js, Express, MongoDB, Gemini API, Cloudinary* | [GitHub Live](#) 2026

- Built a full-stack AI thumbnail generation platform with a responsive, accessible React UI letting creators generate thumbnails using prompts, styles, and color palettes.
- Developed RESTful APIs with Node.js / Express.js, designed MongoDB schemas, integrated the Gemini API with OAuth, and implemented proper loading, error, and empty states across the frontend.
- Crafted a reusable component library with TailwindCSS, consistent design tokens, and pixel-clean responsive layouts so every screen ships with polished states.
- Optimized performance with Cloudinary CDN caching and Vercel serverless deployment; reduced Time-to-Interactive and improved Lighthouse scores on core pages.

PriceDrop | *Next.js, TypeScript, TailwindCSS, Shadcn UI, Supabase (PostgreSQL), Firecrawl, Recharts* | [GitHub Live](#) 2026

- Built a Next.js e-commerce price tracking dashboard with historical trend visualization using Recharts; converted mockups into pixel-clean, responsive UI with full loading, error, and empty states.
- Implemented Google OAuth and a Supabase (PostgreSQL) data layer, writing SQL queries for analytics dashboards, product insights, and price history.
- Designed mobile-first layouts with Shadcn UI primitives and TailwindCSS tokens, ensuring the dashboard renders cleanly across phone, tablet, and desktop breakpoints.
- Integrated Firecrawl with server-side API routes for scalable web scraping across e-commerce product pages, shipped behind clean, reviewable PRs with clear async updates.

EDUCATION

University School of Information, Communication and Technology

B.Tech in Electronics and Communication Engineering CGPA: 7.3/10

New Delhi, India

Aug 2022 – Jun 2026
